Platform: EAS Build/Update, Expo Notifications, Android widgets, AdMob, in-app purchase concepts, Google Play Console, deep linking

Product Engineering: offline-first apps, i18n and RTL, responsive UI, performance optimization, debugging, Git/GitHub, REST APIs

EXPERIENCE

Independent Mobile App Developer | HZF Apps, Abu Dhabi, UAE 2026 - Present

- Published and maintain four production Android apps on Google Play using React Native, Expo, JavaScript/TypeScript and modern mobile development workflows.
- Built HabitRail with habit scheduling, streaks, statistics, reminders, backup/restore, RTL support and 17+ languages; the app has reached 500+ downloads.
- Delivered offline search and bookmarking in Hadith, conversion and calculator features in Unitly, and Quran reading, Azkar, Qibla and Tasbih experiences in the Quran app.
- Manage EAS builds/updates, Google Play releases, app localization, performance improvements, bug fixes and production support.

Freelance Frontend Developer | Blackdantella, Abu Dhabi, UAE Aug 2024 - Oct 2024

- Built a responsive MERN e-commerce platform from client requirements, including product filtering, JWT authentication and mobile-first interfaces.
- Improved page performance through WebP image conversion and lazy loading, achieving a 90+ performance score.
- Worked directly with the client to clarify requirements, demonstrate progress, resolve feedback and deliver the final solution.

SELECTED PUBLISHED PRODUCTS

- HabitRail: multilingual habit tracker with reminders, statistics, flexible schedules, streak protection and local backup/restore.
- Unitly, Hadith and Quran: offline-first utility and content apps featuring search, history, bookmarks, calculators, localization and device integrations.
